## Disclaimer

WanDex is an open source community developed protocol for the development of cross chain decentralized exchanges built on the Wanchain blockchain. WanDex is free, public, open source software and a set of smart contracts written in Solidity that can be deployed to the Wanchain blockchain (the "WanDex Protocol"). Before using WanDex, please review the provided documentation (the "Documentation") for a detailed explanation on how WanDex works.

WanDex is not owned or maintained by any company or organization. WanDex is available under the Apache License 2.0 -- and the disclaimers contained therein apply including that the Wanchain is provided "on an AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND". Anyone who uses WanDex will assume the full responsibilities of such usage and damages whatsoever associated with your use, inability to use, or your interaction with other users of WanDex, including any direct, indirect, incidental, special, exemplary or consequential damages, loss of profits, WAN, Ether (ETH), ERC20 tokens, WRC20 tokens, or any other cryptocurrencies or data.

You acknowledge that the current version of WanDex is under continuous development, and as such has not been fully-tested and may not perform as designed.

On WanDex, WAN, ETH, ERC20 tokens, BTC, and EOS may be wrapped as WRC20 tokens and used for trading through WanDex (and other tokens or cryptocurrencies may be added in the future). While you should always be thoughtful about WAN, ETH or other tokens/cryptocurrencies you wrap or trade (and can lose) through WanDex, the concerns regarding loss of these tokens or cryptocurrencies is particularly acute with actively developed software that may not perform as designed, including that the current version of WanDex may not accurately reflect the intent of the smart contracts or the Documentation. Your use of WanDex involves various risks, including, but not limited to losing tokens/cryptocurrencies. Careful due diligence should be undertaken as to the amount of WAN, ETH or other tokens/cryptocurrencies you trade using WanDex with full understanding that any trading of these tokens/cryptocurrencies could be subject to total loss. You assume any and all risk associated with your use of WanDex.

You are solely responsible for compliance with all laws that may apply to your particular use of WanDex. Cryptocurrencies and blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. The Wanchain Foundation makes no representation regarding the application of any laws, including but by no means limited to those relating to gaming, options, derivatives or securities, to your use of WanDex. Indeed, depending on the jurisdiction and the contemplated use of WanDex (whether yours or another's), that use may be considered illegal. You agree that the Foundation is not responsible for determining whether or which laws may apply to your use of WanDex. You may modify WanDex under the terms of the applicable open source license to effectuate your compliance with any applicable laws.
